Office Action Summary	Application No. 10/763,490	Applicant(s) HARALDSSON, TORE	
	Examiner Pradeep C. Battula	Art Unit 3722	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Page 3 and Line 18 of the specifications states "The locking mechanism 2 of the binder is used to lock the binder in different positions, that is to say closed or half – open." The part in question is the word "say", it seems that "stay" might be the appropriate word.

Appropriate correction is required.

Claim Objections

Claims 11 – 20 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of the previous claims. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 – 20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a locking mechanism with the disclosed structure, does not reasonably provide enablement for allowing the locking rail to lock a binder in any kind of position. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the

Art Unit: 3722

invention commensurate in scope with these claims. The applicant only discloses a means to make and how it will be used but the specifications are not enabling for the claimed binder locking mechanism to lock a binder in different positions.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1- 20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: The locking mechanism being inserted into the binder cavity and locking the binder in different positions. Furthermore, whether it is the rings or the binder covers being locked is unclear.

Allowable Subject Matter

At this time patentability can not be determined in view of the 112, 1st rejections.
